Hazardous chemicals (cleaning)
- Human disease, illness
- Attack, violence, abuse
- Objects on ground
- Uneven or slippery surface

Tasks:
- Twisting, bending positions
- Lifting, throwing, pressing

 Movements

Risks:
- Hazardous chemicals (cleaning)
- Dust inhalation
- Allergic reaction, localised - itching, fatality
- Lost / missing worker
- Distance from assistance / emergency services
- Communication restricted signal
- Needle stick injuries, HIV/AIDS
- Fungal, viral or bacterial infections
- Tetanus
- Serious physical injury / threats
- Serious psychological injury / threats
- Bruises, sprains, strains
- Muscular stress / Muscle

Risk Assessment for Cleaning Public Restrooms.

Include:
- Nature of hazards
- Fitting of personal protective equipment
- Manual handling
- Housekeeping
- First Aid

Cleaning chemicals:
- Dilute only when necessary
- Use protective clothing
- Use in well-ventilated areas
- Store in a safe place
- Keep out of reach of children

Precautions:
- Never mix cleaning chemicals
- Avoid direct contact
- Wash hands after use
- Refer to manufacturer’s instructions

Equipment:
- Gloves
- Protective clothing
- Ventilation
- Breathing apparatus
- Emergency procedures
- First Aid kit

Instructions (read and understood)

Notes:
1. Apply cleaning agent to the floor, and then scrub using a brush.
2. Wipe the floor with clean water.
3. Apply cleaning agent to the sink, toilet seat, and cistern until clean.
4. Wipe the toilet seat and cistern with clean water.
5. Apply cleaning agent to the urinal and allow it to work for a few minutes before scrubbing with clean water.
6. Apply cleaning agent onto the cloth and wipe over the cistern, toilet seat, and cistern button or handle so as not to contaminate it.
7. Apply cleaning agent to the mirrors and sink. Scrape and scrub with a new bin liner.
8. Apply cleaning agent to the mirrors and sink. Wipe with clean, dry cloth.
9. Apply cleaning agent to the mirrors and sink. Wipe with clean, dry cloth.
10. Apply cleaning agent to the mirrors and sink. Wipe with clean, dry cloth.
11. Apply cleaning agent to the mirrors and sink. Wipe with clean, dry cloth.
12. When cleaning mirrors and sinks, use a clean cloth or tissue, soap and paper hand towel dispensers.

Ensure caution signs once floor surface is dry and reopen the restroom.

Fumes / vapours start building up during cleaning – stop work, prevent entry, and evacuate the area. Ensure ventilation and open windows. Use proper ventilation equipment to minimize exposure to chemicals.

Ensure that all cleaning agents are properly labeled and stored in a secure location.

Use dustpan and brush to collect broken glass, and dispose of them in a restricted area. Only reach into areas that may contain sharp objects. Ensure that all sharp objects are collected properly as they may contain sharps. Use tongs if available to ensure proper handling.

Complete any observations or reports as required.
